 AB The present invention relates to phosphatase polypeptides, nucleotide sequences encoding the phosphatase polypeptides, as well as various products and methods useful for the diagnosis and **treatment** of various phosphatase-related diseases and conditions. Through the use of a bioinformatics strategy, mammalian members of the MAP kinase phosphatase PTP's and STP's have been **identified** and their protein structure predicted.

PARN [0001] The present invention claims priority to U.S. application Ser. No. 09/866,987 filed May 30, 2001 and provisional application Serial No. 60/208,291, filed May 30, 2000, which are hereby incorporated by reference in their entirety.

SUMM FIELD OF THE INVENTION

[0002] The present invention relates to phosphatase polypeptides, nucleotide sequences encoding the phosphatase polypeptides, as well as various products and methods useful for the diagnosis and **treatment** of various phosphatase-related diseases and conditions.
